C3 Early Multitrack Recordings HW 2 – Aretha Franklin 'Respect' & Studio Outboard

Artist: Aretha Franklin (Atlantic Studios, NYC, Engineer: Tom Dowd)
https://www.youtube.com/watch?v=6FOUqQt3Kg0

1. In 1967, Atlantic Records engineer Tom Dowd recorded Aretha Franklin on an 8-track tape machine. Identify the pan position / track allocation for the instruments shown below. (3)

Instrument / Vocal Group	Stereo Position / Track Element
Lead Vocal (Aretha Franklin)	Centre
Brass & Saxophone Section	
Rhythm Section (Drums & Bass)	
Backing Vocals ("Sock it to me")	

2. What dynamic musical event and percussion element enters prominently at 0'24"? (1)

.....

.....

3. What year was this track released, and give ONE reason based on the dynamic punch and clarity of the rhythm section why this was not recorded in the early 1950s? (2)

.....

.....

.....

4. During the late 1960s, studios relied on optical and variable-mu compressors. Compare how the Teletronix LA-2A (optical) and the Fairchild 670 (variable-mu) control dynamic levels on vocals and drums. (4)

.....

Name: ..... Due: **Next Class / Friday**

5. Aretha's lead vocal features deep, shimmering acoustic ambience achieved with an EMT 140. Explain the mechanical and acoustic operation of a plate reverb and how decay time is adjusted. (4)

.....
.....
.....
.....
.....

6. Describe how you would close-mic a powerful soul/gospel lead vocal in a modern professional recording studio to avoid plosives and proximity bass boost: (4)

Choice of Microphone & Accessories (2)
Microphone: Accessories (e.g. pop shield / shockmount):
Microphone Polar Pattern & Singer Distance/Angle (2)
